# MAD WAGON

- Chassis kit is approximately 30% pre-assembled.
- Required for operation: R/C system, speed controller, motor, and battery.
- Brushless motor with diameter of 36 mm and length of 60mm to 68mm recommended.
- New generation KB-10 chassis is designed as a platform for various R/C categories including off-road models.
- Lightweight main chassis equipped with many optional upgrade parts as standard provides excellent value.
- Includes wagon-style ULTRA SCALE BODY.
- Separate parts for the body and decals are unique to this kit version.
- Body features light buckets which are compatible with optional LED light unit (No. 97054-4B).
- Shaft-type 4WD chassis with a proven double wishbone suspension delivers exceptional driving performance.
- Full ball bearing (22 pieces) specifications delivers excellent drive efficiency from each component.
- Telescoping resin universal shaft reduces drive loss and prevents shafts coming loose in contact.
- Equipped with high-grip 2.8-inch tires and wheels. General-purpose 2.8-inch tires and wheels for 1/10 scale can also be installed.
- Change from the standard gears for a wide range of reduction ratios, including for on-road driving.
- Equipped with a wheelie bar at the rear of the machine that prevents flipping under hard acceleration.
